

Sheet 2 Prehistoric Farmers

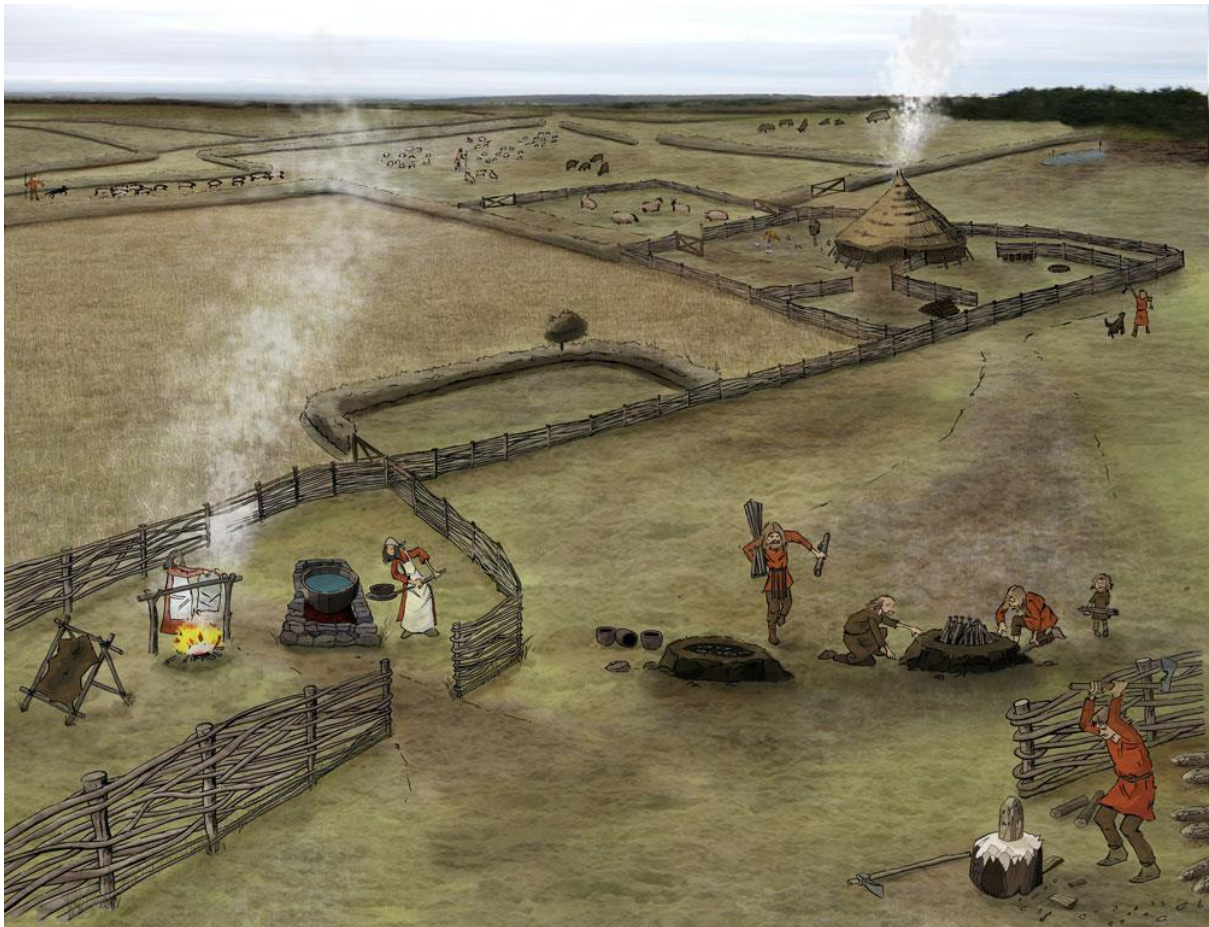

Image Courtesy and © Mark Hoyle

The picture above shows a prehistoric farm. It includes a roundhouse set amongst fields divided up by fences. In the foreground, a woman is preparing to bake some bread whilst fish are being smoked nearby, some men are making ovens to fire pottery and another man is chopping wood. In the background are flocks of sheep and herds of cattle.

What are the items in the picture made of? Where might that have come from and what effect would getting them have had on the area?

What would the people who lived here have eaten? How would they have got it and what effect would that have had on the area?

How would the people that lived here travel? And what effects would that have on the area?
