

Mm, no. It's, it, well, the kit what we were getting like ballistic glasses, well, I'm glad to have them because, mm, when an IED went off one of the lads got injured and, mm, well, the ballistic glasses like the stuff was, the stuff was stuck in my glasses, like a bit of shrapnel and I'm glad to wear the glasses. [Laughter] Because like I turned away and I, like when I looked out of my glasses I could see a little line in it, I looked down and it was shrapnel off the bomb and I just 'wow'. If I didn't have them on me I would have no eyesight.
